

Thank you for being a valued customer!

Your Klarify-C (cyclosporine 0.1% ophthalmic emulsion) compounded prescription has been changed by your physician to **VEVYE (cyclosporine ophthalmic solution) 0.1%**, an FDA-approved treatment for the signs and symptoms of dry eye disease.

Get to know more about your new prescription:

VEVYE is a **water-free** formulation that has a small 10 microliter drop.

DIFFERENT FILL SIZE than Klarify C! VEVYE comes in a 2mL fill that last 30 days when properly administered.

Apply 1 drop of VEVYE to each eye every 12 hours.

Do not touch the bottle tip to the eye or other surfaces. Remove contact lenses prior to using VEVYE. Wait 15 minutes before reinserting contacts.

We are here to ensure you have a smooth transition from ImprimisRx to PhilRx for your VEVYE prescription.
Contact us and we would be happy to assist you.

Your prescription has been filled by PhilRx. Please contact us at any time for a refill or learn how you can enroll into automatic refill.

INDICATION AND USAGE:

VEVYE® (cyclosporine ophthalmic solution) 0.1% is a prescription drop used to treat the signs and symptoms of dry eye disease.

IMPORTANT SAFETY INFORMATION

- To avoid the potential for eye injury and/or contamination, do not touch the bottle tip to the eye or other surfaces.
- VEVYE should not be administered while wearing contact lenses. Remove contacts prior to using VEVYE. After applying VEVYE to the eyes wait 15 minutes before reinserting contact lenses.
- The most common side effects include eye irritation (8%) and temporary blurred vision (3%).

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.

For additional information about VEVYE, please see the **Full Prescribing Information** accompanied with your medication.
